

# HyOx Medical Director Named One of Atlanta's Top Doctors

**Atlanta Magazine's List of the City's Most Trusted Physicians**

Whom do you trust to find the right doctor? There's nothing reassuring about those online insurance directories, and referral services don't necessarily have the patient's best interest at heart. That's why we asked doctors themselves. Where would they send their families if they needed help? The following list represents the top picks of hundreds of local doctors. It includes the physicians' contact information, primary and secondary hospitals, and areas of special expertise.

*Atlanta Magazine's* Top Doctors list was compiled by Castle Connolly Medical Ltd., a New York-based healthcare research and information company. Castle Connolly's physician-led team of researchers follows a rigorous screening process to select top doctors.
