Figure 6: Follow-Up Visit 7/17/08

This 64-year-old diabetic female suffered multiple contusions and abrasions from a car accident, including a left foot wound that would not heal. The patient underwent a left 5<sup>th</sup> toe and 4<sup>th</sup> toe amputation, showing difficulty with healing of the left foot wound. The patient was referred to HyOx Medical Treatment Center and participated in 21 pre-operative hyperbaric oxygen treatments and 19 post-operative, for a total of 40.

**Result:** Full wound closure.
